

Dear Valued Customer,

At Trick Cable & Switch our goal is to provide you with a product that will give you guaranteed satisfaction. We start by manufacturing our switch panels with the finest products available. This insures connectivity and quality through the entire assembly process and top performance in your car.

All of our switch panels are circuit breaker protected. The Roll Bar and Dragster panels have manual reset circuit breakers located under the panel for instant and easy access. In Dash panels have self-resetting circuit breakers located behind the switches. There is no more chasing down or changing fuses in the pits or in the staging area.

The switch panel comes pre-wired and completely assembled, ready for installation. The panel is shipped with 25' of color-coded wire for each circuit along with detailed instructions for easy installation.

What makes Trick different from anything else on the market is that *you design it for your car*. You'll decide how it's laid out, how it's labeled and the panel's color. (See insert for color selection.)

**YOU CHOOSE THE:**

- Number of switches
- Function of each switch
- Face plate color
- Switch color
- Light Color

We also offer anodized case colors for a small additional fee.

Trick offers a **FREE** technical support line to help with any questions you may have about our products or the installation of the panel. Trick also offers competitive dealer incentives.

Shop the switch panel market. When you've checked the competition, we believe you'll find that nothing exceeds the quality products and service you'll receive from Trick Cable & Switch. Feel free to call us for more information at 1-877-53TRICK. You'll be glad you did!
